- This is the certificate of my final year project research paper publication on JETIR Journal.

Inter-college research presentation Participate certificate:

-This is a certificated that I represent our college in inter college's research convention (Mumbai zone) .

PROJECTED -

Netflix -clone (Video Streaming App):

- The objective of this project is to replicate the design and layout of the Netflix App using HTML and CSS.
- This project serves as a practice exercise to enhance my front-end development skills.
- It is a responsive project, it works any devices i.e. desktop , mobiles ,tablet, etc.
- This clone project is based on the design of the homepage of Netflix App.
- Features:
 - Responsive design
 - Navigation bar
 - Header and footer sections
 - Image galleries or sliders
- In the future, I plan to enhance the project by adding JavaScript for interactivity, such as a dynamic image slider or form validation.

Airbnb - clone (Tourism experiences App):

Objectives

- Recreate the User Interface (UI) - The primary goal is to replicate the look and feel of the Airbnb homepage, including the header, navigation bar, search bar, listings grid, and footer.
- Responsive Design- Ensure the website is fully responsive and functions well on various devices, including desktops, tablets, and mobile phones.
- Key Features
 - Header and Navigation Bar.
 - Listings Grid.
 - Responsive Design.
 - Footer.
- Future Enhancements - Adding JavaScript functionality to make the search bar interactive.
